## Monthly Factsheet - January 2026

### Strategy for the portfolio

The five pillars of the strategy can be summarized into a pyramid-shaped approach. Every investment instrument must fall in one of the buckets.

TACTICAL	CASH, MARGINS & CASH LIKE	2.6%	2.6%
	GLOBAL EQUITY	26.0%	42.5%
	EUROPEAN EQUITY LARGE CAP	4.5%	
	ROW EQUITY	0.0%	
	EMERGENTI	3.7%	
	GLOBAL HY	8.2%	
BETA	ALPHA/CONVEXITY	10.4%	10.4%
	CORE	ALTERNATIVES MARKET NEUTRAL	17.4%
		GOVIES	24.8%
		GOLD	2.2%
			44.5%

Source: Banca del Sempione SA

### Monthly summary

January was marked by increased volatility on equity markets, in a context of macroeconomic uncertainty and growing attention to central banks' next moves. In the United States, the Federal Reserve left rates unchanged, reiterating its intention to wait for further signs of slowing inflation before proceeding with any cuts during 2026. However, markets began to price in the possibility of an initial rate cut as early as this spring, supported by weaker-than-expected labor market data and a cooling price environment.

In Europe, the ECB maintained a similar tone, stressing that the disinflationary process is underway but still incomplete. European government bond yields remained fairly stable despite expectations of a closer monetary easing than assumed in December.

The Swiss National Bank also reiterated its cautious strategy, while signaling the possibility of intervening on the exchange rate in the event of further upward pressure on the Swiss franc.

Stocks markets were generally positive during the month: the S&P 500 closed the month up 1.4%, while the Nasdaq 100 gained around 1.2%. In Europe performances were more mixed with the Euro Stoxx 600 up 3.2%, while the Swiss SMI fell slightly to -0.60%.

Commodities showed mixed trends as well: Brent oil rose toward \$70 a barrel, driven by rising tensions in the Middle East, while gold closed the month up 13.3% despite a sharp decline in the final days of the month, supported by renewed demand for hedging against geopolitical risk and renewed demand from central banks. On the cryptocurrency front, Bitcoin closed the month down around \$78,000, continuing its generally negative trend.

### Top Performers

- Global Equities
- L/S Equities

### Worst Performers

- Government bonds
- Tactical Equities

### Positioning and market view

In January, the fund had a performance of +2.05%, in line with the benchmark's +0.6%. The positive return was mainly driven by the portfolio's equity component, through strategic portfolio selection oriented toward value themes, and specific themes in smart grids/robotics/infrastructure/biotech. The bond component made a slightly positive contribution thanks to credit carry and low duration, while government indices underperformed due to rising long-term yields. The alternatives component performed slightly positively, aided by gold and equity selectivity. Following the influx of new liquidity, we decided to increase the bond component through long-duration government bonds. We also opted to almost halve our gold exposure near the year's highs, replacing it with increases in CTAs in the alternatives component and a Latam ETF for the equity component. The fund's positioning is: 33% bonds, 34.3% equities, 27.9% alternative funds with the remaining part in gold and cash.

### Risk Indicator

#### Risk Profile

Potentially lower returns      Potentially higher returns

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (5 years). The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or

because we are not able to pay you. This Product is rated in the category above mentioned, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy". The capital is not guaranteed.

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

**Credit Risk:** the Product may invest in debt securities which are exposed to the risk that the borrower will be unable to meet its repayment obligations.

**Interest Rate Risk:** interest rate risk is the possibility that the value of the assets of the Product will decline as the result of an unexpected change in interest rates, especially but not limited, for investments in bonds.

**Risk linked to the use of derivative:** Due to the use of derivatives, the Product may have increased exposure to particular investment known as leverage. A fall in value of such investments can result in a proportionately greater loss to the Product. A careful use of derivatives can be beneficial to the Product but implies additional risks different from traditional assets such as the risk of divergent valuation depending on the application of different pricing methodologies. The use of derivatives can result in greater fluctuations of the Product assets and may cause the Product to lose as much as or more than the amount invested.

**Liquidity Risk:** which may occur: when investments are made in financial instruments that could have a lower level of liquidity in some circumstances for example in the case of a market crash or default of issuers and/or due to massive redemptions of shareholders resulting in a potential decrease of the value of certain of the Product's investments.

**Custody Risk:** the Product invests in assets priced in foreign currencies which may be adversely affected by changes in exchange rates in relation to the currency.

**Market Risk:** the Product may experience losses from fluctuations in securities prices in portfolio.

**Counterparty Risk:** the Product may suffer losses if a counterparty to a financial instrument defaults and fails to meet its payment obligations to the Product.

**Operational Risk:** this is the risk that failures, problems and/or inadequacies of systems, processes and/or people (in particular by the investment manager) may cause losses to the Product.

**The list of possible risks is not exhaustive; full risk information is available in the Sale Prospectus, chapter 5 "Special consideration on risks".**

### Glossary

**Share class** sub-fund of a fund differentiated in terms of client type, fee structure, currency, minimum investment or other characteristics. The characteristics of each share class are described in the offering prospectus. **Management fee** is a fee that covers all costs charged to a fund in relation to portfolio management services and, if applicable, distribution services. **Incentive fee (performance)** is a fee withheld by the management company based exclusively on the results achieved by the fund and is calculated if the fund performs better than a reference index, the benchmark, or if it records a gain in absolute terms. **Duration** indicates the number of years an investor should keep a position in the bond until the present value of the bond's cash flows to equal the amount paid for that bond. Longer is the duration, more the price of a bond will be influenced by changes in interest rates. Duration can also be used to compare the risk of debt securities with maturities and yields. **High Water Mark (HWM)** is the highest value achieved by a fund and it is used as a threshold to measure a manager's performance. In the case of this fund, according to the HWM principle, no performance fee will be charged if the NAV, before considering the fee, is lower than the latest reference NAV. Any losses accumulated in the past can be written off after a period of five years. The performance fee is assessed at the end of each calendar year, following a calculation method described in the prospectus. **Index** is a portfolio that holds a broad range of securities according to predefined rules. Some indices are used to represent the performance of particular markets and therefore serve as a point of reference for measuring the performance of other portfolios. An index used as a reference for performance comparison is called a "benchmark index". **ISIN** (International Securities Identification Number) unique code that identifies a specific financial security. It is assigned by the respective national coding agency of a country. **Bonds** are debt (for the entity that issues them) and credit securities (for the entity that purchases them) that represent a portion of debt taken out by a company or public body for financing. They guarantee the buyer the reimbursement of the capital (at the end of the pre-established period) plus interest (the remuneration that is due to those who purchase bonds in exchange for the sum invested). **High Yield Bonds** are a type of corporate bond that offers a higher interest rate due to its greater risk of default. Credit rating evaluates the ability of a bond issuer to repay all its debt obligations (interest and principal) on time. High ratings, such as AAA or Aaa, indicate low risk (i.e. a low probability of default), while ratings such as BBB- or Baa3 indicate greater risk. **Yield to maturity (YTM)** indicates the fund's return if all the bonds in the portfolio were to be held until the maturity date. The ratio is expressed as a percentage annual return. **Volatility**, the fluctuation of a fund's performance over a given period, provides an analysis of the amount of risk and uncertainty in a security or portfolio. Typically, higher is the volatility, riskier is the securities or portfolio.

### Important Information

This document is a MARKETING COMMUNICATION relating to BASE INVESTMENTS SICAV (the "SICAV"), an investment company with variable capital established in Luxembourg, validly incorporated in accordance with the laws in force in Luxembourg and authorized by the Commission de Surveillance du Secteur Financier (CSSF), Luxembourg Financial Market Supervisory Authority. This document does not constitute in any way a solicitation of an offer to purchase shares in countries where such sale or solicitation is not authorized; furthermore, the shares of the SICAV may not be offered, sold or delivered in the USA or to US persons. The promoted investment concerns the acquisition of shares of the SICAV not in its underlying assets (such as shares of companies in which the SICAV invests). **Please consult the Sale Prospectus and the Key Information Document (KID) before making a final investment decision. These documents may be downloaded from our website [www.basesicav.lu/documents](http://www.basesicav.lu/documents), together with the Articles of Incorporation and semi-annual and annual financial reports.** Furthermore, such documentation is available free of charge, both in English and in the local language of the market in which the SICAV is authorized for distribution, at the SICAV's registered office at 5, Allée Scheffer, L-2520 Luxembourg, at local representatives, paying agents, and at the SICAV's distributors. **Please note that not all sub-funds and share classes may be available in your country. Additional information for investors in Switzerland:** The Representative and Paying Agent in Switzerland is: Banca del Sempione SA, Via P. Peri 5, CH-6901 Lugano, Switzerland. The place of execution is at the registered office of the SICAV Representative in Switzerland. The competent court is at the registered office of the SICAV Representative in Switzerland or at the registered office or domicile of the investor. **Additional information for investors in Italy:** In Italy the documentation listed above relating to the SICAV is available at distributors and on the website [www.basesicav.lu/documents](http://www.basesicav.lu/documents). The updated list of the distributors and the respective Paying Agents is made available to the public at the same distributors, at the respective Paying Agents (Banca Sella Holding S.p.A, Allfunds Bank S.A.U) and on the aforementioned website. A summary of investor rights is available here [www.basesicav.lu/documenti/altro](http://www.basesicav.lu/documenti/altro) in the local language of the jurisdictions where the individual share class is registered for marketing.

The Sicav or the Management Company may decide to terminate the arrangements made for the marketing of its collective investment undertaking in one Member State in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.

Past performances are not indicative of future results. Performance figures do not take into account any share issue or redemption fees or charges. Past results are shown in the share class reference currency. Yields are shown before tax charges. Investors are reminded that future returns are subject to taxation, which depends on their personal situation and may change in the future.

All data reported here, including fund information, has been obtained or calculated by Banca del Sempione SA. All data refers to the date of the document, unless otherwise indicated. Although we believe that the information contained herein comes from reliable sources, Banca del Sempione SA cannot assume any responsibility regarding its quality, correctness, timeliness or completeness.

Complete information on costs is available in the Sale Prospectus, chapter 25 "charges and costs" and in the individual sub-fund sheets, chapter 30 "Annex I - Sub-Funds".
