## Monthly Factsheet - June 2025

### Strategy for the portfolio

The five pillars of the strategy can be summarized into a pyramid-shaped approach. Every investment instrument must fall in one of the buckets.

Source: Banca del Sempione SA

### Monthly summary

The month of June ended with a mix of encouraging signals for global markets, despite the context still being strongly influenced by geopolitical factors, inflation dynamics and expectations on the directions of monetary policy, particularly of the FED. The most significant event was the war between Israel and Iran, in which the US also intervened militarily to prevent Iran from having nuclear weapons. The war was relatively short and did not affect the positive sentiment of the market.

The bond market had a month of recovery. US Treasury yields fell, with the 10-year recording a decrease by around 20 bps closing the month at 4.22%. Positive news came from inflation readings that did not increase despite fears of a hike from tariffs. The FED meeting kept rates unchanged despite a strong push from the US president and his entourage for a reduction in rates. At the European level, a further cut by the ECB did not bring much benefit to government rates with the bund and other main yields remaining almost unchanged.

On the equity front, the main global indices closed the month in positive territory. In the United States, the S&P 500 gained almost 5%, while the Nasdaq continued to benefit from the rally in the technology and artificial intelligence sector, closing with a rise of more than 6%. In Europe and Asia, there was a more moderate recovery, aided by the wait for the trade deals under discussion with the Trump administration and with a deadline in early July.

On the currency front, the dollar continued to weaken, touching multi-year lows against the euro at 1.18. For commodities, gold was basically unchanged following the improvement in the geopolitical situation, while oil, despite a significant rally in the days of the Iranian conflict with peaks above 77 dollars, then closed the month at 65 USD a barrel.

#### Top Performers

- Global equity
- Emerging local currency

#### Worst Performers

- Gold
- Sistematic Directional

### Positioning and market view

In June, the fund had a performance of +0.89% against that of the reference benchmark of +1.74%. June was a positive month for global financial markets, despite the intensification of the conflict in the Middle East with the war between Israel and Iran, and especially considering the participation by the United States. On the macroeconomic front, data continues to show relatively stable economies that for the moment do not seem to be affected by the duties applied by Trump, even on the inflation front the readings have not signaled significant increases in inflation. As regards the performance of the fund, the best results came from the equity component, in particular from global exposures and from some themes with greater beta on the market such as nuclear. Good results also from bond strategies at both government and corporate levels. The main systematic strategies, detractors of the fund, did experience a more complex environment.

During the month, some adjustments were made to the higher-yielding bond component, moving to more flexible and long-short credit strategies. The current portfolio composition is: 33.8% bonds, 34.3% equities, 23.2% alternative funds with the remaining part in gold and cash.

## Monthly Factsheet - June 2025

## Risk Profile

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

**Risk linked to the use of derivative:** Due to the use of derivatives, the Product may have increased exposure to particular investment known as leverage. A fall in value of such investments can result in a proportionately greater loss to the Product. A careful use of derivatives can be beneficial to the Product but implies additional risks different from traditional assets such as the risk of divergent valuation depending on the application of different pricing methodologies. The use of derivatives can result in greater fluctuations of the Product assets and may cause the Product to lose as much as or more than the amount invested.

**Custody Risk:** the Product invests in assets priced in foreign currencies which may be adversely affected by changes in exchange rates in relation to the currency.

**Market Risk:** the Product may experience losses from fluctuations in securities prices in portfolio.

**Counterparty Risk:** the Product may suffer losses if a counterparty to a financial instrument defaults and fails to meet its payment obligations to the Product.

**Operational Risk:** this is the risk that failures, problems and/or inadequacies of systems, processes and/or people (in particular by the investment manager) may cause losses to the Product.

The list of possible risks is not exhaustive; full risk information is available in the Sale Prospectus, chapter 5 “Special consideration on risks”.

**Share class** sub-fund of a fund differentiated in terms of client type, fee structure, currency, minimum investment or other characteristics. The characteristics of each share class are described in the offering prospectus. **Management fee** is a fee that covers all costs charged to a fund in relation to portfolio management services and, if applicable, distribution services. **Incentive fee (performance)** is a fee withheld by the management company based exclusively on the results achieved by the fund and is calculated if the fund performs better than a reference index, the benchmark, or if it records a gain in absolute terms. **Duration** indicates the number of years an investor should keep a position in the bond until the present value of the bond's cash flows to equal the amount paid for that bond. Longer is the duration, more the price of a bond will be influenced by changes in interest rates. Duration can also be used to compare the risk of debt securities with maturities and yields. **High Water Mark (HWM)** is the highest value achieved by a fund and it is used as a threshold to measure a manager's performance. In the case of this fund, according to the HWM principle, no performance fee will be charged if the NAV, before considering the fee, is lower than the latest reference NAV. Any losses accumulated in the past can be written off after a period of five years. The performance fee is assessed at the end of each calendar year, following a calculation method described in the prospectus. **Index** is a portfolio that holds a broad range of securities according to predefined rules. Some indices are used to represent the performance of particular markets and therefore serve as a point of reference for measuring the performance of other portfolios. An index used as a reference for performance comparison is called a "benchmark index". **ISIN** (International Securities Identification Number) unique code that identifies a specific financial security. It is assigned by the respective national coding agency of a country. **Bonds** are debt (for the entity that issues them) and credit securities (for the entity that purchases them) that represent a portion of debt taken out by a company or public body for financing. They guarantee the buyer the reimbursement of the capital (at the end of the pre-established period) plus interest (the remuneration that is due to those who purchase bonds in exchange for the sum invested). **High Yield Bonds** are a type of corporate bond that offers a higher interest rate due to its greater risk of default. Credit rating evaluates the ability of a bond issuer to repay all its debt obligations (interest and principal) on time. High ratings, such as AAA or Aaa, indicate low risk (i.e. a low probability of default), while ratings such as BBB- or Baa3 indicate greater risk. **Yield to maturity (YTM)** indicates the fund's return if all the bonds in the portfolio were to be held until the maturity date. The ratio is expressed as a percentage annual return. **Volatility**, the fluctuation of a fund's performance over a given period, provides an analysis of the amount of risk and uncertainty in a security or portfolio. Typically, higher is the volatility, riskier is the securities or portfolio.

### Important Information

This document is a MARKETING COMMUNICATION relating to BASE INVESTMENTS SICAV (the "SICAV"), an investment company with variable capital established in Luxembourg, validly incorporated in accordance with the laws in force in Luxembourg and authorized by the Commission de Surveillance du Secteur Financier (CSSF), Luxembourg Financial Market Supervisory Authority. This document does not constitute in any way a solicitation of an offer to purchase shares in countries where such sale or solicitation is not authorized; furthermore, the shares of the SICAV may not be offered, sold or delivered in the USA or to US persons. The promoted investment concerns the acquisition of shares of the SICAV not in its underlying assets (such as shares of companies in which the SICAV invests). **Please consult the Sale Prospectus and the Key Information Document (KID) before making a final investment decision. These documents may be downloaded from our website [www.basesicav.lu/documents](http://www.basesicav.lu/documents), together with the Articles of Incorporation and semi-annual and annual financial reports.** Furthermore, such documentation is available free of charge, both in English and in the local language of the market in which the SICAV is authorized for distribution, at the SICAV's registered office at 4, rue Robert Stumper, L-2557 Luxembourg, at local representatives, paying agents, and at the SICAV's distributors. **Please note that not all sub-funds and share classes may be available in your country. Additional information for investors in Switzerland:** The Representative and Paying Agent in Switzerland is: Banca del Sempione SA, Via P. Peri 5, CH-6901 Lugano, Switzerland. The place of execution is at the registered office of the SICAV Representative in Switzerland. The competent court is at the registered office of the SICAV Representative in Switzerland or at the registered office or domicile of the investor. **Additional information for investors in Italy:** In Italy the documentation listed above relating to the SICAV is available at distributors and on the website [www.basesicav.lu/documents](http://www.basesicav.lu/documents). The updated list of the distributors and the respective Paying Agents is made available to the public at the same distributors, at the respective Paying Agents (Banca Sella Holding S.p.A, Allfunds Bank S.A.U) and on the aforementioned website. A summary of investor rights is available here [www.basesicav.lu/documenti/altro](http://www.basesicav.lu/documenti/altro) in the local language of the jurisdictions where the individual share class is registered for marketing.

The Sicav or the Management Company may decide to terminate the arrangements made for the marketing of its collective investment undertaking in one Member State in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.

Past performances are not indicative of future results. Performance figures do not take into account any share issue or redemption fees or charges. Past results are shown in the share class reference currency. Yields are shown before tax charges. Investors are reminded that future returns are subject to taxation, which depends on their personal situation and may change in the future.

All data reported here, including fund information, has been obtained or calculated by Banca del Sempione SA. All data refers to the date of the document, unless otherwise indicated. Although we believe that the information contained herein comes from reliable sources, Banca del Sempione SA cannot assume any responsibility regarding its quality, correctness, timeliness or completeness.

Complete information on costs is available in the Sale Prospectus, chapter 25 "charges and costs" and in the individual sub-fund sheets, chapter 30 "Annex I - Sub-Funds".
